# **WEATHER KEY POINTS**

**08/27/21 - 09/02/21**

## **Friday-Thursday**

- Gusty north winds of 20-35 mph combined with very low humidity will bring critical fire weather conditions to the northern Sacramento Valley and nearby foothills today through Saturday morning
- Hot temperatures of 95 to 105 will spread north from interior southern California through much of the Central Valley and lower elevation foothills, including many coastal areas of central California through the weekend. Even hotter temperature of 105-115 are expected over the southern California deserts.
  - Moderate to locally high heat risk impacts are expected in many areas
  - Heat Advisories and Excessive Heat Warnings are in effect for much of interior southern California through the weekend
  - Heat impacts will dwindle after Monday as cooler temperatures make a return statewide
- Despite lighter winds for the remainder of the state, low humidity levels both during the day and at night will bring elevated fire weather conditions through the weekend, with an increase in winds expected by Sunday and Monday
- Periods of thicker wildfire smoke will continue to reduce air quality and visibility at times through the weekend, particularly across northern and central California
- A gradual increase in showers and thunderstorms is possible across southern California Sunday through the middle part of next week
